- **Washington State UBI**  
600-357-687
- **WA Contractor's License No.**  
CC DEWITCI055QA
- **OR Contractor's License No.**  
63072
- **Also licensed in MT, ID, CA MT, ND and UT**
- **DUNS Number**  
09-849-5278-CS2
- **NAICS Codes**  
238910 – Structural piles, demolition, earthwork, utility installation
- **Union Affiliations**
  - International Union of Operational Engineers Local 701 (OR Operators)
  - Pacific NW Regional Council of Carpenters Local 196 or 197 (Pile Bucks)
  - 737 Laborers of Oregon
  - 302-612 Washington Operators
  - Western Washington Carpenters Trust
- **AGC Member since 1988**
- **AGC-Oregon PRIDE (Program Recognition Indicating Dedication and Excellence) Safety Award in 2019 and 2018.**

### Summary of Services

DeWitt Construction Inc is a vertically integrated subcontractor specializing in structural foundation and excavation related services. Our services include all types of excavation, demolition, utility (storm, sewer and water), driven grout pile, augercast pile, driven steel, concrete pile, sheet pile, soldier pile, shoring, tie back anchors, micro/pin pile, drilling and design/build capabilities.

DeWitt Construction Inc. was founded in 1979 and is a fully licensed, insured and bondable contractor capable of handling all of your deep foundation and excavation needs. The founding owner and company officers have worked hard over the years to become one of the most respected and experienced Companies in the Northwest. We pride ourselves on giving every job the complete benefit of this experience, in service, cost control and problem solving.

### Mission Statement

To be the Contractor of Choice for Deep Foundation Construction and Excavation in the Pacific Northwest where Safety, Quality and Production are Core Values.

### Vision Statement

To create a culture where mutual respect, understanding and expected behaviors are central in all that we do.

### Capabilities

- Driven Grout Pile - Produces no spoils, greatly reducing cost and clean up time; Reduced vibration and noise compared to driven pile; Resistant to corrosive conditions.
- Auger Cast Pile - Installed over 35,000 auger cast (AC) and continuous flight auger (CFA) piles primarily in the Northwest; Can install 12" to 36" diameter with depths of 100' or greater; Can act as a design build contractor for AC/CFA work.
- Steel Pile - Used for heavy construction involving pipe, "H" pile, wide flange, and soldier/shoring piles where designated.
- Pipe Splicing – Portable welding splicing table; Certified welders capable of performing the required welding that the pipe pile requires; Pile Splicing Services for Pile Suppliers.
- Shoring Systems - The design and construction of earth retention and shoring systems can be complex due to the soil structure, depth of cut and ground water, weather conditions, superimposed loads, seismic loads, vibrations, and adjacent construction; Experienced team in the design and installation of shoring systems.
- Tie-backs/Micro-Pile - Depending upon the soil conditions and depth of excavation, horizontal tieback anchors are often installed with shoring walls as reinforcement. DeWitt has the equipment, expertise and design capabilities to professional install tieback systems.
- Excavation – Suitable heavy equipment as well as a conveyor system to meet the demands of nearly all residential, commercial or industrial projects involving sitework, underground utility and excavation needs.
- Integration - DeWitt has successfully executed several projects that integrated demolition, excavation, underground utilities, shoring and pile scopes for one
